SriEdu Sample Reading

This is a generated sample document.

It exists so the in-app PDF reader can be demonstrated and tested without downloading a real textbook, and without a network connection of any kind.

The file is produced by tools/make_sample_pdf.py using only the Python standard library, so it is reproducible and carries no third-party licence obligations.

Use it to check: page rendering, pinch zoom, page restoration (reopen and you should land back on the page you left), and the reader's ad-free guarantee.

How the catalogue works

Textbooks and past papers are published by government bodies. SriEdu does not re-host them. Each catalogue item stores:

id	a stable identifier, e.g. ol-2023-science-ta
kind	textbook | paper | term_test | marking_scheme
examType	ol | al | grade5 | term
grade	the school grade (1-13)
year	exam year, for papers
medium	en | si | ta
rights	official_link | open_license | bundled
sourceUrl	the canonical publisher URL

Only items whose rights allow it are ever offered for offline download. Everything else opens on the publisher's site.

Quiz data model

Questions live in the Firestore collection 'questions', mirrored by assets/data/sample_questions.json for offline use.

Each question carries:

subject	subject code, e.g. mathematics
grade	grade level
year	exam year the question came from
examType	ol | al | grade5 | term
medium	medium of the source paper
questionText	{ en, si, ta }
options	[{ en, si, ta }, ...] four of them
correctAnswer	zero-based index into options
explanation	{ en, si, ta }, shown after answering

Question banks can also be stored as a single document per subject/exam/year, which costs one read per quiz and needs no composite index.

Streak rules

A day counts towards the streak when the student either:

* opens a textbook or past paper (in-app or at its source), or
* completes a quiz attempt.

Rules:

* Consecutive calendar days build the streak.
* One missed day breaks it, unless a streak freeze is spent.
* One free freeze per calendar week.
* Longest streak and lifetime study days are never reset.

Everything is stored on the device. No account, no upload.
